

# Renewable and Nonrenewable Project

**Due on:** December 14, 2007

1. Design a placemat for the school cafeteria to use to educate about energy.
  - Brainstorm ideas for what you want people to learn about energy from your placemats.
  - Design fun placemats with crossword puzzles, hidden pictures, trivia questions and answers.
2. Write an energy article for the community explaining the rewards of using renewable energy in their homes (at least 1 page long).
3. (see attach) What can the sun do for you?
  - Draw yourself in your backyard and draw all the things the sun could be doing for you (picture).

**WHAT CAN THE SUN DO FOR YOU?** *This could be your house and backyard. Draw yourself in your backyard and draw all the things the sun could be doing for you.*
